

# Growers Guide to Centre Pivots and Lateral Moves

More Profit Per Drop introduces the Growers Guide to Centre Pivots and Lateral Moves (CPLM), an informative DVD that provides information for potential and current CPLM irrigators. This DVD is a collection of information and real experiences from growers, suppliers, manufacturers, researchers and industry professionals across Queensland.

The Growers Guide provides an overview of the benefits of CPLM machines to irrigators and discusses the types of Centre Pivot and Lateral Move machines available. Importantly the Growers Guide covers the following topics:

- **Planning** – Things to consider before purchasing: layout, water source, system capacity, soils and economics
- **Purchasing** – Comparing quotes, commissioning machines, system evaluations and inheriting older machines
- **Design** – Components and options available for Centre Pivots, Lateral Moves and sprinkler packages
- **Management** – Crop requirements, irrigation scheduling, planting configurations, fertigation, variable rate irrigation
- **Maintenance** – Flushing systems, servicing and spare part availability
- **Troubleshooting** – Addresses runoff, wheel rutting, uniformity, alignment and vermin issues
